Conception of automated and semi-automated special machines

Realisation of automated assembly's system and integration of plate conveyor

knowledge of industrial processes of screwing , sticking , clipping, riveting , crimping , bending , heading, welding , clinching , punching , stamping, draft control, leakage checkin...

MACHINING

OUR SKILLS :

Numerical command and 3D machining of smalls and medium series production of mechanical parts.

6 numerical command MAZAK 3 and 4 axes, 2 numerical control lathe 3 and 4 axes.

Electroerosion and WEDM machine

Prototype part, replacement part, wearing part, mould, tools and technical part for engineering.

Building and assembly of mechanical sub-structures

OUR STRENGTHS :

An ISO 9001-certified **Quality Management System**.

A systematic **quality control** before the delivery of the parts.

The guarantee of the **timely delivery respect** with performing planning tools.

PRINTING MACHINE

OUR SKILLS :

Conception of printing machine on glass or plastic bottle.

screen printing machines
pad printing
UV Sticking
Inside and outside lacquering

CIM Développement have a unique knowledge which allow him to respond to all of your printing issues.

INTEGRATION AND LEASING OF ROBOTS

We have knowledges in integration of paletizing robots , stacker robots , handling robots...

We program on different robots brand : Fanuc , Staubli, Kuka , ABB , Yamaha et Epson ...

We also have a robots leasing activity.

Do not hesitate to contact us to have more informations
